# Baldwin's Fruit Plants

POMOLOGICAL AND HORTICULTURAL  
INVESTIGATIONS  
RECEIVED  
★ JAN 29 1914 ★

O. A. D. Baldwin

*Bridgman, Michigan.*

# WE HAVE REPORTS

from nearly every state in the Union where fruit plants are grown, and we find a very great shortage in all kinds of fruit plants this year owing to the dry weather that has been experienced during the months of June, July and August.

Our customers are writing us very urgently from all parts of the country asking us to book orders for berry plants for spring shipment. They are wise in doing so, because there is bound to be a scarcity due to the

## Shortage of Plants this Year

The crop of berries for the next two or three years will be short and prices unusually high. Now is the time to place your orders, and next Spring is the time to put out more fruit plants. We believe the demand for plants of all kinds for Spring Planting will exceed the supply, and we want to advise our present and prospective customers and friends to order as soon as possible. We have had a

## Good Growing Season Here

We have escaped the drouth. In fact, we have been favored with one of the best growing seasons we have ever had; and as we nearly doubled our acreage this year, we have probably twice as many plants for spring shipment as at any time previous. This enables us to take good care of our customers. We expect to sell every one of our plants, and the shortage elsewhere may mean that late orders will have to take their chances. To be safe about it, order early. At any rate, communicate with us, as we seem to be in the highly favored section this year.

## Buy Baldwin's "New Ground" Plants

We are urging this as a favorable opportunity to engage in the berry business, and particularly to do business with us.

## Orders Filled in Order Received

Buy in time. Order Now.

At this writing (Sept. 22nd) we have booked orders for almost two million Strawberry Plants alone, and we are receiving orders every day. Many of our old customers are sending small payments, requesting us to book their orders and reserve the stock for them.

## OUR GUARANTEE

Every plant we ship is guaranteed to be just as that plant is represented in our catalogue—true to name, and in a first-class growing condition when packed by us. We exercise the greatest care in packing, so that all plants reach our customers in good growing condition (by express.) We will please you or send your money back.

*W. O. Baldwin.*

of this valuable new variety

# Charles I. for Big Profits

---

## The Earliest Strawberry Grown

The big profits in strawberry growing are generally made at the start of the season before the market is overstocked. For years we have been looking for a good extra early strawberry, and in Charles I. we found what we have wanted.

## The Finest Extra Early Strawberry Grown

Charles I. ripens nearly a week before Michell's Early and is very productive, yielding more quarts of large, fine looking berries than any other early variety.

It is a strong fertilizer and a strong grower. Berries are large, regular in form, and of good color and quality.

We are the introducers of this wonderfully profitable new early strawberry and are naturally proud of it.

We want you to plant Charles I. this season, and we guarantee the fruit to please you in every way and make you money. Take our word for it and include Charles I. in your order this year.

We have grown an immense stock of extra nice plants of this variety on our new ground and have cut the price in half for spring shipment.

**\$4.00 for one thousand. \$15.00 for five thousand.**

# BALDWIN'S

## Greeting to Berry Growers

First, we want to thank all of you for helping to make 1913 our biggest year in the fruit plant business. With your patronage and assistance, we are going to sell several million more plants in 1914 than we ever sold before.

In all the years that we have been in the plant business—this is our 26th—we have never greeted our friends more heartily than we do at this time. We have been highly favored this year with an extra good growing season, while so many plant growers all over the country have met with misfortune in the loss of their plants. Our location, our soil, our methods have combined to give us an immense crop of strong, heavy-rooted berry plants, for which we are truly grateful. We come before the public, therefore, feeling confident that we can supply you with both the quantity and quality of plants you want for spring setting.

Eighty-five acres is not considered a very large farm, but eighty-five acres of solid strawberry plants means enough stock to set thousands of acres. When you consider that these plants are all grown on new ground, over fifty acres of it never having grown plants or any other crop except to subdue it, it means much to the fruit growers of this country.

Our new-ground methods of producing Baldwin's berry plants have contributed largely to our success, as we have been able to give every customer a little better quality than he had expected. There is a mighty big difference in the vitality of our heavy rooted, new ground plants and those grown on old run-out land and sent out by many growers and dealers. A difference, not only in the size and appearance of the plants themselves, but in the increased yield and superior quality of the fruit grown from our stock.

Our equipment and facilities for handling stock rapidly and in first class shape have kept pace with our growing business. Your plants are never exposed to the wind, sun or frost, and are fresh dug for every order. We are convinced that our methods of growing, digging and packing plants are right and we ask for your orders, firmly believing that our plants will do well for you and start you in a business that is pleasant and profitable.

In subduing our new ground, we grow a crop of potatoes the first year. We grow good ones and we can save you some money on your seed potatoes this year. New ground potatoes are clean and vigorous and our seed is pure.

A satisfied customer means everything to us and we never allow a customer to be dissatisfied if we know of it. We treat all of our customers alike, the little orders having the same careful attention as the big ones. All orders are appreciated. None are neglected.

Now, let us get better acquainted and we can be of more help to each other than we have been in the past. Write to us and do not be afraid to ask questions. We want to help you start right in the berry business.

Very truly yours,

*A. D. Baldwin*

The question is often asked, "What's in a name?" The answer, so far as we are concerned, means everything—to us, to our friends and customers. We want to emphasize this point because we think it is important for you to know more about us. We have no secrets and would like to have you come here and see every step we take in filling your plant orders. "B" stands for Baldwin. We have made it large because of its importance. If this page were larger, we would probably have made the letter larger. We want you to know that so far as we have right to the use of the letter "B", it stands for

## Baldwin's Big Business

We have tried to tell you in this book something about our business. If you were to visit Bridgman, you could see for yourselves. Not all of our thousands of customers are privileged to see us personally and witness what we are doing. For that reason, we are trying to make it emphatic that our claim for preference, so far as the berry plant business is concerned, is well founded. Heretofore, we have been very modest in asserting ourselves, remembering, as we do, the small beginning that we made over a quarter of a century ago. We are telling you something about our past history on other pages. We are

proud of it and believe as we have achieved such prominence and success in the production of berry plants, that we have a right to speak of it in proper terms. And if this letter "B", which stands for "Baldwin", has caught your eye, may we ask that you give consideration to the further and more important fact that in the purchase of berry plants there is no place in this big land of ours where you can have your needs supplied more honestly, promptly and satisfactorily than right here. We have grown an immense stock of new ground plants—growing nothing but good varieties, all of which have proven their fruiting value here and elsewhere. We have tried to describe each variety carefully and not make any statements that might be misleading to you in any way. After you have bought from us we are just as anxious that you succeed and make money growing berries as we are to get your order. We urge, therefore, that you

## Buy Berry Plants of Baldwin

We have never exploited plants under an assumed name to gain public favor, but have always produced the well known standard varieties, true-to-name, and sold them just that way. We have improved and developed certain varieties, made them to yield better under our favorable soil conditions and Baldwin's method of production, but when we have done this, we have been satisfied. We are not boasting at the other man's expense. Our object of calling your attention to our name in this way is with this one fact in mind: Baldwin is best qualified to supply your needs in the berry plant line. May we ask that you read carefully the pages that follow, observe our methods of doing business and the advice we offer to fruit growers. We feel very keenly the necessity of emphasizing the difference between Baldwin's methods of berry plant production as against the ordinary method pursued by so many that have not the interest at stake and perhaps do not think as much of their good name as Baldwin does.

## A Little History

We have told you that we would give you a little history of our plant business and that we are proud of our record.

Away back in 1889, the fruit plant business was started in this part of the country by the writer's father, O. A. E. Baldwin, whose picture appears on page six. The business was started here on the old homestead where our office and packing houses are now located.

There was a small patch of Cuthbert Red Raspberries growing on the old place in 1888 and the owner noticed a lot of sucker plants growing between the rows. Thinking they could be sold for much less than the price then generally asked, he put a small ad in the Farm Journal, with the result that all the plants were soon sold at a fair price.

The next year, 1889, two hundred little price lists were issued describing two varieties of raspberry and two of strawberry plants. This was twenty-six years ago. There was only one-half acre used for growing plants then and the plants were all packed in an abandoned hen house ten feet square. Later, in 1892, we believe, a small packing house was built measuring 16x20 feet.

In 1897 this room was doubled, making the packing house 16x40 feet. The dining room was used for an office between meals for many years, until in 1902 it became necessary to build an office 12x18 feet to take care of the growing business.

The plant business at Baldwin's Farm grew steadily each year and it soon became necessary to add more land to the nursery. The home consists of twenty acres, but another twenty acres was added about 1894. Still another twenty acres was bought in 1897.

and eighty acres more added in 1899.

We have told you in previous catalogs about the death of O. A. E. Baldwin, which occurred in October, 1902. The writer bought the interest of the other heirs and went into debt for same. We have had to learn many things by experience and have made some mistakes which were expensive.

We have kept growing, however, and now have over four hundred acres, about three hundred of which is new ground and especially adapted to growing berry plants of extra good quality.

Our employees now number about two hundred during our busy season and our expense for labor will amount to over \$12,000 during 1913. Our office building was extended in 1911, making it 18x30 feet, giving us plenty of room to take care of our ever increasing business.

We now have large packing houses and packing cellars equipped with freight elevators, lights for the night force when necessary in our busy season, and all conveniences for handling stock in the best possible manner.

We have been developing our big plant business steadily for the past twenty-six years. By giving every customer full value or a little more for every dollar sent us, we have kept most of their names on our order books every year. We have thousands of these regular, satisfied customers in all parts of the United States and Canada, and they are the leaders in the berry business wherever located.

Baldwin's new ground plants have made a name for themselves in nearly every fruit section and the demand for them has exceeded the supply for several years.

Climatic conditions in southwestern Michigan are such as to produce plants of the most hardy nature. Our new ground produces stock of extra quality. These conditions, coupled with the fact that we give each customer a square deal, have made our rapid growth possible.

# BALDWIN

## General Instructions to Customers

When writing, please sign your name plainly. Be sure to give your postoffice, county and state.

Use order sheet and return envelope, fill out carefully, and much delay and trouble will be avoided. All orders are acknowledged immediately upon receipt.

**Terms.** Cash with order, or part cash, balance any time before shipment. At our prices we cannot afford to do a credit business. We give references as to our reliability, etc., which all are at liberty to investigate.

**References.** As to our standing and reliability, we refer to the Postmaster or Express Agent of Bridgman, Bradstreet's Commercial Report, or Commercial National Bank, of St. Joseph, Mich. (See their advertisement on back cover, bearing our name as a director.)

**How to Send Money.** By check, bank draft, express money order, postoffice order or registered letter.

**Complaints,** if any, must be made within ten days after stock is received. We will then investigate quickly and carefully, making things right at once, if the fault is ours. Please remember we are never liable for more than the first cost of plants.

**Substitution.** We do not substitute one variety for another without your permission unless order is received late in season.

It is sometimes a help to us and also a good thing for our customers if we are allowed to substitute for some variety that may be sold. We always use some variety of same season, sex and quality as that ordered. We will not substitute, of course, unless absolutely necessary.

**Order Early by All Means.** The earlier the better. If anything more is needed it can be added later. If not prepared to send all the money, send a part when the order will be booked; the balance before shipment. Orders are filled in rotation as received, hence it is to your advantage to have your order booked early.

**Methods of Shipment.** Express is the safest, and all things considered, the cheapest way of shipping plants. Plants go for 20 per cent less by express than merchandise. The United States Express Company have a branch office in our packing house, which insures prompt service. We guarantee satisfaction by express. We still ship some stock by freight, but do not recommend freight shipment. Raspberry and blackberry plants, etc., often go through safely by freight where distance is not great. Since we have had the parcel post, some of our customers want mail shipment.

We can ship strawberry plants by mail if 20 cents is added for each hundred plants for postage and wrapping.

Raspberry and blackberry plants mailed for 50 cents extra for each hundred plants.

**Packing.** We make no charge for boxes, barrels and packing, which is done in the best possible manner. We use thousands of light plant crates and handled baskets. We manufacture our own crates for shipping.

We pack with damp moss and shingle tow. Each variety is carefully separated in crate and correctly labeled with printed wooden labels.

**Shipping Season.** We commence to ship the last of March or first of April, according to season, and will continue till May 10th to 15th.

We issue no fall catalogue, but send out some stock after October 1st. Plants are well rooted at that time and we will ship what orders we receive then, at prices quoted in this catalogue.

**Care of Plants When Received.** If the ground is not in condition when they arrive, a very easy method can be used to keep them, which will be a great benefit to the plants, as follows: Take each variety, a bunch at a time, cut string, and spread roots very thinly along the side of a shallow furrow, then cover roots with dirt not higher than the crown of the plants. Give partial shade, and if ground is dry, water roots only. In a few days they will have taken hold, or rather sent out little white fibrous roots, and will be in better condition for transplanting than at first.

**Soil.** Almost any soil that will grow good field crops will grow good berries—good, rich, well drained sandy loam preferred.

**Drainage.** Your berry patch should be well drained the same as your land for any other crop. Tiling of sufficient size to carry off all surplus water is best and saves ground for you.

**Fertilizing.** The best fertilizer we ever found for fruit is stable manure. A crop of clover or other green crop plowed under is good. Fruit plants, like any other crop, need rich ground, and respond quickly to good care and fertilization.

**Preparing Ground.** Soil for setting fruit plants should be plowed deep and harrowed till all lumps are mashed and it is loose and level. Then roll or float just before setting. We use common plank float which you can make with little expense. We use a hand marker (home made), that marks three rows at once.

**Setting Strawberry Plants.** Make holes with a spade by putting in ground five or six inches and pull toward you, then take out. Hold plant in hole with hand, and close hole with foot and press firmly (with feet) on both sides.

Varieties marked (P) are "Pistillate," and should have about every third row set to some staminate variety for fertilizer. Those marked (S) are "Staminate" and are self-fertilizers. Set early staminates with early pistillates and late with late, etc.

Strawberries should be planted 16 inches apart in row with rows four feet apart, requiring about 7,000 plants per acre.

**Black Raspberries** should be planted three and one-half feet apart in row, with rows seven feet apart, requiring about 1725 plants per acre. Set in same manner as strawberries.

**Red Raspberry** should be set about three feet apart in row, with rows six feet apart, requiring about 2425 plants per acre. Set same as strawberry plants.

**Blackberries** should be set three and one-half feet apart in row with rows seven feet apart, requiring about 1725 plants per acre. Set same as strawberry plants.

**Cultivation.** We recommend shallow cultivation as soon as plants are set, or at least within a day or two. This levels the ground and holds the moisture in the ground. Shallow cultivation should be kept up through the growing season.

**O. A. E. Baldwin,**  
Founder of the Business.

**O. A. D. Baldwin,**  
Present Proprietor.

Blossoms should be pinched off from all plants first season. This throws the strength into the roots and develops a strong, healthy plant that will give you a big crop of nice berries the following season. If you do not want a wide matted row (and we would not recommend matted rows for best fruit), you should cut off all runners that start up till about July 1st. There will then be plenty coming on later and your parent plant will be strong and vigorous.

**Care of Patch after Picking.** Most of our customers, we think, will find it profitable to leave their strawberry patches for the second crop. A good way to care for

**Our Office and Residence—on the Farm.**

Some of our Packing Houses as seen from the Pere Marquette Railroad.

a patch after the first crop is off is as follows: If field is weedy, mow it and rake it off. It will be necessary to commence cultivation at once, and if the matted row is too wide we take a furrow away from each side of the rows, making a "back furrow" or ridge in the middles. Commence cultivating at once, a double shovel cultivator being the best tool to level the ground. We sometimes drag our old patches with spring tooth drag instead of plowing between the rows. This will destroy some plants, but will leave plenty and give them a chance to send out new runners.

For further information and general instructions please write us.

We will be glad to help you at all times. Your success in the berry business means our success in the plant business.

In the foregoing pages we have attempted to give you reasons why it is to your advantage to favor us with your orders for berry plants. This locality is naturally adapted to the growth of berries and berry plants, but the secret of our success is the fact that Baldwin's plants are all grown on new ground, which produces extra large, heavy-rooted stock. We have over one hundred acres still in the woods, some of which is being cleared every year as we need it for growing more plants. (See picture below showing the black, rich soil being torn up with stump machine.)

You can look at us from a big B viewpoint, diagonally, perpendicularly or horizontally. Whichever way you view "Baldwin" you will find everything about him and his business just as we have tried to represent it in these pages. Read carefully.

We invite patronage upon a merit basis. The thousands of satisfied customers that we have on our books make it easy for us to ask you for your orders. Every customer means a friend for us. We not only make friends but keep them.

*O.A.D. Baldwin*

Clearing our new ground for plants with stump machine.

## CERTIFICATE OF NURSERY INSPECTION.

No. 1355.

This is to Certify, that I have examined the nursery stock of O. A. D. Baldwin, and find it apparently free from dangerous insects and dangerously contagious tree and plant diseases.

This certificate to be void after July 31, 1914.

L. R. TAFT,

State Inspector of Nurseries and Orchards.

Agricultural College, Mich., Sept. 26, 1913.

### A Perfect Stand of Our New Ground Plants in Oklahoma.

Adair, Okla., Apr. 27, 1913.

O. A. D. Baldwin, Bridgman, Mich.

Hello, O. A. D. B.:—"Your plants were extra fine, all young, and good count. I have them all set and will say I don't believe I will lose a plant.

What I mean is, the good count you sent will more than make up for what few plants may die. I notice you sent me plants, not wind, as I have had of some others. Everything is more than satisfactory." I remain.

Yours for future business,

NELSON STINSON.

### Berries from Baldwin's New Ground Plants Bring 2c per Quart More than Berries from ordinary plants all thru the season.

Oneonta, N. Y., Mar. 13, 1913.

O. A. D. Baldwin, Bridgman, Mich.

Friend Baldwin.—"Your letter and catalog at hand and I want to say that the plants I bought of you two years ago were the finest I ever saw and they have done extra well. The fruit was extra fine, so nice that we obtained 2 cents per quart more for our berries than others got here and if I ever want more plants they will be bought from O. A. D. Baldwin. Wishing you lots of success." I am, as ever,

J. B. GOODSSELL.

### Baldwin's New Ground Plants vs. Ordinary Plants.

Route 2, Madison, Ind., Mar. 10, 1913.

O. A. D. Baldwin, Bridgman, Mich.

Dear Sir:—"Your catalog arrived in due time and I expect you have now received my order for this year.

The plants I received from you last year were in fine condition and I can truthfully say, were as fine as I ever saw, and I have been in the business for about thirty years. They were set next to and in the same kind of ground with plants from another northern nursery. I soon found out, and in a very few days, that it was not necessary to put a division line between them.

This is the difference, late in fall—the plants I received from you had formed a complete matted row, which I can assure you looked good to me, while the other plants set the same day and having same care, were badly missing and did not show a vigorous growth. Your plants were all plants. It looks like time and money thrown away to set out plants like those received from the other nursery as the crowns looked void of life and had very few roots. Please fill my order this year with same quality plants that you have sent me before and I will be perfectly satisfied."

Yours respectfully,

EDGAR J. COCHRAN.

Lewis Stanard.

For the past 22 years Mr. Stanard has been with us and has had entire charge of our strawberry plant growing and packing for many years. He thoroughly understands this branch of the business. The reason plants reach our customers in good shape and bring them good returns is because we have made a study of the growing and packing of our stock.

Oscar Seavers.

This is the seventeenth year that Mr. Seavers has had charge of our strawberry plant diggers. He has made a study of the best methods of handling strawberry plants from the field to the packing house, and sees that there are twenty-six good strong plants put into every bunch and that they reach our packing houses in first class condition.

Geo. Hann.

This is Mr. Hann's twelfth season as foreman of our cane plant packing cellars. He understands cane plants thoroughly. Mr. Hann has several able assistants and sees to it that no stock goes out that is not in first class condition and properly labeled and packed. We very seldom receive a complaint about stock not arriving in good shape.

We are all working together—for Satisfied Customers. That's why Baldwin's Big Business is Growing.

A Million Helen Davis on our New Ground.

## Valuable New Strawberries

**HELEN DAVIS** (Perfect flower. See illustration).

One of the largest strawberries ever produced. A wonderful yielder and every berry smooth and well shaped. A grand early strawberry. The plants are strong and healthy, a good plant maker and produce strong fruit stems, and many of them. The fruit is a sight to see. We seldom find a strawberry, especially an early berry, having so many superior points as Helen Davis, described as follows:

**Plants.** Hardy and strong.

**Fruit.** Extra fine quality and appearance.

**Size.** One of the very largest of strawberries.

**Color.** A beautiful, rich dark red, clear through.

**Shape.** Perfect and smooth.

**Flavor.** In a class by themselves, a peculiar velvet quality not found in others.

**Productiveness.** One of the most, if not the most productive strawberry grown.

**Season.** Early and continues to bear all through the strawberry season.

You can make money with Helen Davis. You will find our prices far below those of other growers and we bought our stock direct from the introducer, Mr. George W. Davis, of Indiana, last year.

We urge all of you to buy some Helen Davis plants this year. They will not disappoint you. Helen Davis is the berry so largely advertised in all the fruit papers last season. Last year we were sold out of Helen Davis early and were obliged to disappoint some of our customers. This year we have grown about a million plants of this wonderful new strawberry and hope to supply the demand.

Order Helen Davis sure.

Our price only \$4.00 per thousand.

✓ Helen Davis.

✓ Charles I.

**CHARLES I.** (Perfect flower). (See illustration.) A wonderful extra early strawberry. Charles I. was introduced by us three years ago. They are becoming a great favorite in many fruit sections and are making good wherever grown.

The big profits in strawberry growing are generally made at the start of the season, before the market is overstocked.

For years we have been looking for a good extra early strawberry, and in Charles I. we have found what we wanted.

This grand variety ripens nearly a week before Mitchell's Early and is very productive, yielding more quarts of large, fine looking berries than any other early variety. The berries are large, regular in form and of good color and quality.

You can get big prices for Charles I. because they ripen very early, and are also nice large berries of good quality and extra fine appearance.

We guarantee Charles I. to please you and make you big money. We have grown an immense stock and have reduced the price of Charles I. to \$4.00 per thousand.

See colored insert next to front cover.

## Fall Bearing Strawberries

(See reproduction of photograph on back cover.)

Set same as other strawberries, keeping fruit stems picked off till about July 1st same as on all new set plants. They will produce a good paying crop the same year they are planted. They bear from about August 15th till freezing weather in November. You can grow them successfully.

Nearly everyone agrees that strawberries are the best fruit that grows, and now you can pick fresh strawberries nearly all summer, and a good paying crop, too. This year we fruited several varieties of Fall Bearing Strawberries, all of which produced a good crop of fine fruit.

Superb was far ahead of all the other varieties on our grounds, both in size of berries and in yield. Superb is extra fine in color and quality and is a wonderful strawberry, besides being a fall bearing variety. We recommend Superb. We also have several other fall bearers.

Fall Bearing Strawberries are a success. You should have them for your own use, anyway, and if you can do it, order five hundred or one thousand plants. The fruit will sell quickly at from 25c to 50c per quart. There is money in it for you.

Loading Plants—Packed Ready for Shipment. A Busy Season Scene.

Fall Bearing Strawberries shipped from Bridgman to Chicago on consignment to commission merchants on South Water St. sold at \$3.00 to \$5.00 per 16-quart crate. Think what can be done where a fancy trade could be supplied. Our fall bearers, especially Superb, produce great quantities of fruit and will make you big net profits. Get started this spring.

Superb Fall Bearing Berries and Ripe Corn picked October 2nd, 1913.

To the lady of the house—Fresh, ripe strawberries in autumn are a novelty, but you can grow them in your garden in the fall, just as well as in June.

Our Superb fall-bearing strawberries will produce a nice crop of large, beautiful berries for you during August, September, October and November. The quality of this fruit is first class, too—berries are smooth and dark, glossy red in color; flavor is far above the average found in June-bearing strawberries.

Don't you want some of these nice berries to serve to your friends when they call at your house this fall?

A dish of nice strawberries with cream is mighty good to eat at any time, but served at that time of year is a treat your guests will appreciate and remember. The expense for plants is very small—one or two hundred plants of Superb will produce enough berries for your family, guests and some of the neighbors.

Send us your order for fall-bearing strawberries—but do it soon, as nearly everybody who reads this catalog will want some too.

**SUPERB** (Perfect flower). This is the best and most profitable fall bearing strawberry grown. Superb berries are much larger than other varieties and of far better quality and better appearance. They will also outyield all other fall bearers, or at least have done so with us.

Just a half mile of solid strawberry plants grown on our new ground for spring delivery.

Superb are the best known and most largely planted of the fall bearing strawberries. They seem to produce a heavy crop of fine fruit wherever grown.

The plants are strong and stand the winter well after producing a heavy crop of fruit from about Aug. 15th till Nov. 15th, according to season.

The fruit of Superb is very large, round, rich, dark colored, glossy, attractive and smooth. Each berry is of good shape and ripens all over at once.

Buy Superb plants, and we guarantee that you will never be sorry. They are the leading fall bearing strawberry everywhere.

We want you to compare our prices with those of other growers. We have an extra large stock of heavy-rooted Superb plants on our new ground and our price is only 75 cts. per dozen; \$4.00 per hundred; \$30.00 per thousand.

See illustration on page 11 showing ripe Superb strawberries and ripe corn picked same day.

✓ **IOWA** (Perfect flower). This fall bearing strawberry was introduced by M. Crawford of Ohio, well known as an authority on strawberries. We bought our stock from the introducer at a high price and our plants are pure. The berries are large, nearly round, of fine appearance and quality. The flavor is something extra fine. Iowa is not as good as Superb with us this year, but has done well. Price, \$1.00 per dozen; \$4.00 per hundred.

✓ **PROGRESSIVE**. This new fall bearing variety seems to be a very good one. The new runner plants produce a nice lot of berries of good quality. The berries are not as large as Superb and not so good quality, but they yield well and, we think, will be one of the best known varieties of fall bearers in a few years. The fruit of Progressive is of good size, smooth, of good color and appearance. Progressive plants are still very scarce and price is higher than the others. Our stock is limited, but our plants, being grown on new ground, are extra strong and well rooted. Price, \$1.00 per dozen; \$5.00 per hundred.

✓ **AMERICUS** (Perfect flower). One of the first fall bearing varieties introduced and we believe there are several much better ones. Our Americus yielded well this fall, but berries are smaller and not nearly so good in quality and appearance as Superb. We have a nice lot of genuine Americus plants grown on our new ground and they are fine ones. They are great producers and in some places are giving big profits. Berries are good color. Price, \$1.00 per dozen; \$4.00 per hundred.

✓ **FRANCIS** (Perfect flower). We were somewhat disappointed with the fruit of Francis on our place this fall. There was a big crop of berries, but they were rather small and not of first class appearance. We will not replant Francis on our farm. They seem to do well in some localities. Price, \$1.00 per dozen; \$4.00 per hundred.

Digging Senator Dunlap, Oct. 2nd, 1913. Note the wonderful growth on our new ground at that date.

# General List of Strawberries

(For price by the hundred, etc., see page 32.)

## Extra Early Varieties

✓ **AUGUST LUTHER (S).** We believe this to be the best very early strawberry grown (with the exception of our new Charles I). We have tested nearly all the early varieties and recommend August Luther to be far ahead of any other early berry now generally grown. It is prolific, comes early and continues to bear till practically every berry reaches a good size. Fruit is very uniform in size and shape. Plants are healthy and make good row. The fruit is of good size, roundish, bright red, firm and very easily picked. It succeeds best on rather light soil. The fact is we have found by experience that the early varieties do best on light soil. We would advise all our customers and friends to set August Luther for early berries. The demand for this extra profitable early variety has always exceeded the supply with us. On account of our immense stock we have reduced the price to \$2.50 per thousand.

August Luther.

✓ **CHARLES I. (S).** Our new extra early berry. See illustration and complete description on page 10 of this catalogue. We guarantee Charles I. to bring you paying crops of extra early berries. It is a wonderful early strawberry. Price reduced to \$4.00 per thousand. (See colored reproduction of photograph of Charles I. on insert next to front cover.)

✓ **MICHEL'S EARLY (S).** One of the earliest varieties grown. The plant is a very robust grower, strong and healthy, although plant is rather small; one of the best of the early fertilizers, as it blossoms early and late. Fruit is of medium size and good quality. This old early variety is known wherever strawberries are grown. Many of our customers order Michel's Early and make money with them, although we recommend August Luther as a better berry, and we believe that our Charles I. will soon be the favorite early strawberry. Price of Michel's Early, \$2.50 per thousand.

✓ **BEDER WOOD (S).** We have fruited this variety for many years and found it to be a very heavy bearer, of good sized, roundish fruit (about as firm as Bubach), season early, a good staminate to fertilize early varieties like Crescent, Warfield, etc. The plant is a good healthy grower, and sends out a number of large runners. Beder Wood is very deep rooted and will stand a drouth better than most varieties. Will consequently do extra well on a very dry or light piece of ground. Some of our neighbors are growing strawberries for Chicago market and have discarded all other varieties, growing Beder Wood alone. This early strawberry will bring you good returns. Price, \$2.50 per thousand.

## Medium Early Varieties

**BALDWIN'S PRIDE OF MICHIGAN (S).** We call this variety Baldwin's Pride of Michigan as there was a Pride of Michigan introduced by the Kellogg Company about the same time, that we knew nothing about when we named our berry. The two varieties are entirely different, as the Kellogg berry is late, we believe, while Baldwin's Pride of Michigan is a medium early variety.

Baldwin's Pride of Michigan is, without doubt, one of the very best and most profitable varieties of strawberry. Very hardy and a strong grower. One of the most productive of strawberries, producing large crops of good sized, highly colored fruit of extra fine quality. Berries are well shaped and are very attractive. We have never yet been able to supply the demand for this valuable new variety. We have grown a large stock of fine new ground plants this season. Price, \$3.50 per thousand.

**HELEN DAVIS (S).** This celebrated new strawberry is described and illustrated on page 9 of this catalog. We have the largest stock of genuine Helen Davis plants in the country. We guarantee every plant, and they are strong, heavy-rooted, new ground plants that will please you.

We want every one of our customers to get started with this wonderful strawberry this year. Helen Davis is a money maker. Price reduced to \$4.00 per thousand.

**SENATOR DUNLAP (S).** This is the leading strawberry throughout the United States. We sell more Senator Dunlap plants than any other variety, and the demand for this variety has steadily increased every year since its introduction. It does well everywhere and produces enormous crops of fine fruit regularly.

Senator Dunlap is of the Warfield type, has a perfect blossom, is hardy, productive, a splendid keeper and able to hold its own under any "rough and tumble" methods of culture to which it is likely to be subjected. Senator Dunlap is a very

heavy bearer of good size, evenly shaped fruit of a very beautiful dark red color, and its flavor is delicious. For canning it is fine, making a rich, red syrup. It is a first class shipper, and retains its brightness long after being picked. It always looks well on the market and sells quickly at top prices. The best proof we have that this berry is a big money maker everywhere is the fact that our customers in nearly every state in the Union are ordering Senator Dunlap in large quantities every year, often planting several acres solid to this variety. We cannot well recommend Senator Dunlap too highly, as we guarantee it to please you in every way. The sale of Senator Dunlap is wonderful.

We again sold considerably more than two million Senator Dunlap plants the past season. Order them for your main crop.

Senator Dunlap is the leading commercial strawberry the country over.

Price, \$2.50 per thousand.

**HIGHLAND (P).** A good new strawberry from Ohio, and has become very popular there. Fruit medium to large, bluntly conical; color

Senator Dunlap.  
Two-thirds natural  
size.

bright scarlet; flesh red clear through. Plants very large, strong and vigorous. Flowers imperfect and quite resistant to cold. Price of Highland, \$4.00 per thousand.

✓ **HAVERLAND (P).** Exceedingly productive; fruit large and very fine; one of the most popular and well tested varieties; withstands drouth better than most kinds; color light, season early. Considered throughout the United States as a moneymaker in almost any climate. Demand for plants has always been much larger than the supply. You will not miss it in buying some Haverland. They are a good sure berry. Bought largely for main crop all over the country. They make a good sized fruiting row and mature an immense amount of fruit which is very easy to pick, being plainly in sight. We cannot say too much in their favor. Try them and you will agree with us. Haverland will bring you a paying crop of good berries anywhere. Price, \$3.50 per thousand.

Warfield (one-half natural size.)

✓ **WARFIELD (P).** This is the grand berry for main crop, both for home use and market. We recommend Warfield fertilized with Senator Dunlap for most profitable strawberry crop you can grow if you have a good market for medium early berries. Fruit is regular shape, dark red and a splendid shipper. We sell more plants of this than of any other variety excepting Senator Dunlap. Resembles Wilson, but is a heavier bearer and better plant maker, and better shipper. Plants are small, more like Crescent; requires a strong staminate about every other row for best results. We recommend Warfield to all for profit. It is, and has been for years, one of the standard varieties.

Warfield is extra fine for table and canning. The dark red color clear through makes it a very desirable home use berry. Warfield will please you in every way. Price, \$2.50 per thousand.

✓ **NORWOOD (S).** This is the genuine "Norwood" you have read so much about. We bought our plants of the introducer, and have grown a good stock of extra nice plants. We have sold entirely out of this new variety each year we have had it, as the demand for Norwood has been very heavy, and they are rather a slow plant maker. The plant is strong and healthy, having very large leaves, the berry is very large and is regular in shape. Norwood do not yield very heavy with us but the berries are large and very fine looking. It is a good berry for very fancy fruit, but we do not recommend it for commercial purposes.

Norwood became popular on account of being so attractive. Extra large and of very fine quality. Berries are much like the Marshall in appearance. Color bright red all the way through, growing darker with age; firm, a good keeper, and will ship well. Price, \$4.00 per thousand.

✓ **LADY THOMPSON (S).** This is a great early Southern berry. The fruit is of medium large size, a good shipper and has a good market value. Lady Thompson will withstand dry weather very well and is one of the profitable standard varieties grown in the South. We are making a low price on Lady Thompson, and remember they are Michigan grown. Price, \$3.50 per thousand.

✓ **CLYDE (S).** This berry has Crescent blood in it and no doubt gets its immense productiveness from that variety. Nearly as large as the Bubach, nearly or quite a week earlier and very much firmer. It is a strong staminate and therefore is suitable for pollenizing medium and medium early pistillate varieties. The plant is very vigorous and healthy, there being no trace of disease about it. The foliage is light green in color and somewhat resembles the Haverland, but is a more upright and sturdy grower. Its strong plants with an abundance of long roots enable it to withstand drouth better than most sorts. It is a very profitable market berry owing to great amount of good sized berries it produces. Our new ground plants, \$4.00 per thousand.

✓ **SPLENDID (S).** We have fruited this variety for several years and can offer it to our customers with great confidence. Plant is a healthy, luxuriant grower, sends out many runners and bears abundantly. The fruit is large and far above the average in quality and appearance. Desirable for either market or home use. This variety has been tested by many berry experts all over the country and has proved itself worthy of its name. Splendid is an extra good canning variety and brings good prices on the market. Price, \$3.50 per thousand.

✓ **CRESCENT—(Improved) (P).** The standard of productiveness all over the country; succeeds everywhere; stands neglect best of any, plant small, berries fair size, bright and attractive, not very firm. Many growers consider this the most profitable berry for market. A few years ago a new berry was introduced into this section, which proved to be an improved Crescent. We sell a great amount of this variety every year. We have a full stock of extra fine plants and quote them at \$2.50 per thousand.

✓ **LOVETT (S).** This is a standard variety and is a good dependable berry in all soils and seasons. A good producer of large, evenly shaped berries. Lovett is an extra strong grower and brings paying crops everywhere. A good commercial berry. The fruit is firm, medium to large size, conical, and of good quality. Price, \$2.50 per thousand.

## Medium Late Varieties

✓ **GLEN MARY (S).** Large and choice, very handsome, and of fine flavor; vigorous and productive. It is as large as the Sharpless and of superior quality. In productiveness it far surpasses the Crescent, not in number of berries, but quarts of berries. Many growers here consider this the most profitable of strawberries. Glen Mary is not only an extra good berry for fancy market, but a real money maker for

Glen Mary.  
One-half natural size.

Our Office—Where your orders are received, carefully booked and promptly acknowledged.

any market. We believe one can pick as many quarts of good berries from Glen Mary as from any other variety and they will sell quickly at a good figure. We recommend this variety to our customers with perfect confidence that it will please them.

As many of you know, we have always sold out of Glen Mary long before our shipping season is over and have been obliged to disappoint many customers. This year we planted over two acres of Glen Mary and we have grown an immense stock of splendid new ground plants and believe we can supply the heavy demand for this money-making strawberry. Price, \$4.00 per thousand.

✓ **BUBACH (P).** This has been a very popular berry for years. We have always considered Bubach a profitable variety. The plant is very large and fine looking, but a slow plant maker, the berry large and showy. If you have a nearby fancy market, it will pay you to get a large, fine looking berry. Bubach will please you and make you handsome profits. The demand for Bubach always exceeds the supply and we advise all to place their orders for this variety early. Price, \$4.00 per thousand.

✓ **GIBSON (S).** A wonderful new strawberry. (See picture from photograph, in natural colors, opposite our greeting on page 1.) Gibson, we believe, is the most profitable variety of strawberries grown. That is a very strong statement, but we have often told our customers that if we were growing strawberries for market and were restricted to one variety, we would choose Gibson.

Please read our description carefully. Gibson commences to bear with Senator Dunlap, Warfield, etc., but owing to its wonderful productiveness it continues till quite late, so we class it with our medium late varieties. It is a very strong grower, with long roots that withstand dry weather, and has plenty of dark green foliage to protect its enormous crop of fruit from the direct rays of the sun.

Look at these qualifications:

✓ **Productiveness**—The vines are simply loaded with berries. You will hardly understand how the plants can produce such quantities of fruit.

**Size**—Berry is extra large. One of our very largest strawberries.

✓ **Color**—A beautiful dark, glossy red. The flesh of the berry is red clear through. Its appearance cannot well be beaten. Calyx is bright green, adding greatly to its beauty and market value.

**Quality**—The flavor is as fine as can be found in any strawberry; a perfect table and canning berry and owing to its tough skin it is one of the very best of shipping varieties.

**Shape**—Nearly round and regular. A berry which sells itself on any market.

**Fruit Stems**—Are plenty and are strong and upright. This keeps the fruit up out of the sand where they are clean and where they are easy to find and pick.

We want to introduce this valuable strawberry this year into every state in the Union and have put the price where it is within the reach of all.

We think we are safe in saying that we have of our own growing more Gibson plants than the combined stock of all the other nurserymen in the United States. We guarantee satisfaction with Gibson.

New ground plants of this wonderful strawberry, \$4.00 per thousand.

**CORSICAN (S).** This variety is in the heavy weight class. Not only are the berries large, but they are uniform in shape. The color is bright red. They are very firm and will sell for a fancy price on any market. The foliage is exceedingly vigorous and leathery, resisting fungus and drouth. It is both profitable and a pleasure to grow a fancy berry like the Corsican. This variety will please you and we recommend Corsican to all customers as a very large, attractive berry that will command fancy prices on the market. Try Corsican this year, and you will never be sorry. One of the most beautiful and profitable varieties of strawberries. We guarantee them. Price, \$4.00 per thousand.

**HERITAGE (S).** A new berry much advertised and well recommended. We have the genuine Heritage that have been making such a big reputation in the eastern states. It is a handsome berry and the plants are extra strong and thrifty. Heritage is the finest looking strawberry plant we grow and they are money makers. The plant is very large, deep rooted and extremely free in fruiting, beginning to ripen its fruit about early mid-season, and continuing to very late. The berry is a dark, shiny crimson to the center. Has a perfect blossom. Carries an unusually heavy green calyx (adding decidedly to its market value). Extremely large from the first picking, holding its size well through the season. Try a few Heritage this year. They will please you. Price, \$4.00 per thousand.

**UNCLE JIM (S).** (Sometimes called Dornan.) Plants are large and free from rust. Berry is large, regular form, and season is medium late. Uncle Jim is a comparatively new introduction, but it is one of our most profitable berries. We recommend Uncle Jim for profit. Goes nicely with Bubach. We have grown a good stock of extra heavy plants of this variety. Price, \$4.00 per thousand.

**Baldwin's New Ground Senator Dunlap Fruiting on Farm of M. M. Scates, El Paso, Ill.**

O. A. D. Baldwin, Bridgman, Mich.

El Paso, Ill., June 19, 1913.

Dear Sir:—"I am sending you a photograph of one of my strawberry patches and if it would be of any use to you, I would like to see it in your next catalog. This patch was produced from your Senator Dunlap plants."

Yours,  
M. M. SCATES.

Pocomoke.  
Two-thirds natural size.

✓ **POCOMOKE (S).** This variety was found where there had been some Wilson and Sharpless strawberries dumped, and is supposed to be a seedling of the old Wilson, crossed by the Sharpless. The berry is round and resembles the old Wilson, but is much larger. One of the best varieties in existence, not only for its enormous productiveness, but on account of its beauty, adaptability to all soils, its foliage enduring the dry, hot weather, its large size, its deep color, its firmness and high flavor. The plant is a strong, robust grower, with deep roots and lots of them, perfect blossoms, and is an enormous yielder of large red berries. It ripens evenly, and is one of the best shippers yet introduced. This variety is a good one, and is

grown as one of our leading market berries. We guarantee entire satisfaction with Pocomoke. Try a few thousand. You will not be sorry. We have grown an extra large stock of Pocomoke, and hope to have enough plants to supply the heavy demand for this valuable variety. Price, \$3.50 per thousand.

✓ **PARSON'S BEAUTY (S).** An extra good strawberry that can be depended on to bring a paying crop every year. Plant is a strong grower with plenty of dark green foliage. Wonderfully productive. Berries are very large, evenly shaped, and have a beautiful dark glossy finish. They closely resemble Pocomoke in every way. Parson's Beauty is a good profitable strawberry and we recommend them to our customers. Price, \$4.00 per thousand.

✓ A Million Aroma—Our Best Late Berry. Another fascinating scene on Baldwin's Farms.

## Very Late Varieties

✓ **GANDY (S).** This is one of the leading late varieties with fruit growers all over the country. The plant is a strong grower, fruit is large and firm; requires strong soil and fertilizers to do its best. It is very late and a big, showy berry. Gandy is always quoted at the highest price in every market. It is the finest looking fruit and sells quickly at top prices.

You will not make a mistake if you plant some Gandy for late fancy berries. We have a fine stock of heavy rooted plants, and expect to be able to supply the heavy demand for this valuable late variety. Price, \$3.50 per thousand.

✓ **BRANDYWINE (S).** A valuable late strawberry especially adapted to home use and canning owing to its very dark red color and fine flavor. Brandywine should be grown for home use and for your canning berry. Brandywine is late, good shape, good quality, good size, firm and productive. This variety is also a very good shipper and of fine appearance, making it an extra good market variety.

We have grown a large stock of new-ground Brandywine plants and our price is low. \$3.50 per thousand.

✓ **WM. BELT (S).** The plant is very large, a most luxuriant grower and remarkably productive. Berry is very large, conical and uniform in shape. Color of Wm. Belt is extra fine, being a brilliant glossy red and ripening all over at once. This valuable late variety should be planted on well drained land, as it sometimes rusts on wet ground. Wm. Belt is a profitable late variety. Price, \$3.50 per thousand.

✓ **AROMA (S).** (See illustration below). This is our best and most profitable late strawberry (with the possible exception of Sample). Aroma, we think, is grown all over the country as the finest and most profitable of the very late varieties of strawberries. We will guarantee the fruit of Aroma to please all who give it a fair trial. It cannot well be beaten for quantity of fruit produced or in quality of fruit. Plants show no weakness of any kind. Fruit very large, roundish, conical, rarely misshapen, glossy red, of excellent quality and produced in abundance.

The demand for Aroma plants has exceeded the supply every year for the past ten years. We have grown an extra large stock of fine Aroma plants and believe we can supply the demand for spring setting. We advise you to place your order early, however. Aroma will please you. It is the best late strawberry grown.

Price, \$3.50 per thousand.

Aroma.

Sample.

✓ **SAMPLE (P).** One of the very best of strawberries and a money making late variety. Sample is the most profitable very late strawberry (excepting Aroma) grown in this country. They produce a very heavy crop of extra fine, showy berries. Berry is of large size and fine quality, continues a long time in fruit; the berries are large to the last. It will yield as many berries as the Haverland, and will average as large as the Bubach. Colors all over at once. Foliage perfect, fruit perfect. You will like Sample and they will make big money for you. Sample is one of the leading late strawberries everywhere and you will not miss it in planting this popular late variety. Price, \$3.75 per thousand.

✓ **STEVENS' LATE CHAMPION (S).** This is a good all around late strawberry. Plant growth extra good. The fruit is large, showy and of fine flavor. Ripens with Gandy.

Stevens' Late Champion makes strong, vigorous plants which yield heavy crops of fruit, and plenty of sturdy runners which take root promptly. The fruit is large, long, a little flattened, and sometimes slightly creased, but generally smooth. The color is bright red, and the flesh is also red, but lighter. It ripens all over, and has a firm surface protected by prominent seeds. It is one of the best to keep after being picked, and is good for canning. Stevens' Late Champion will please you.

This variety is a great favorite in the south and southwest, and is a real money maker everywhere. Stevens' Late Champion will bring you a good paying crop of nice, large, attractive berries. Price, \$3.50 per thousand.

Baldwin's New Ground Plants Growing on Farm of A. A. Donham, West Terre Haute, Ind.

Mr. Donham grows strawberries extensively and writes that Gibson and Charles I are his best paying varieties. On Sept. 25th, 1913, he writes: "Charles I stood dry weather best of all and Gibson was next. Gibson is certainly an extra good berry, but Charles I has the whole field beaten in every way; a good plant maker, big berries and foliage enough to protect them."

Yours truly, A. A. Donham.

# Red Raspberries

(For price by the hundred, etc., see page 32.)

✓ **MILLER.** Is early, and does not winter-kill. Shipping qualities are perfect, makes a healthy growth of canes. If you want the best medium early red raspberry, set Miller. Probably the strongest point in favor of the Miller is its splendid keeping qualities. They will hang on the bushes several days without becoming soft. This quality makes them very profitable to the grower. We strongly recommend Miller to all. Price, \$7.00 per thousand.

✓ **KING.** This is a wonderful early red raspberry. We believe you can make money faster with a good patch of King than with any other variety of fruit, if you have a good market for fancy, early red raspberries. The berries are very large, bright red, firm, and easily picked. Cane is perfectly hardy, and a strong grower. We guarantee King to please you.

King.

King is the earliest and most beautiful red raspberry we have ever grown and always brings top prices. Include King in your order for spring planting this year sure. Price, \$7.00 per thousand.

✓ **THOMPSON'S EARLY.** A very profitable early red raspberry. The fruit is extra good quality and comes very early, bringing top prices. Thompson's Early are being set very extensively in this locality for Chicago market. We recommend this variety to all who can get a good price for early red raspberries. Price, \$7.00 per thousand.

✓ **RUBY.** A new red raspberry that is certainly a fine one in every way. Large, beautiful, bright red berries that command top prices on any market. Mid-season. Ruby is not yet generally known, but the demand for plants of this variety is growing steadily. Ruby produces an immense amount of very highly colored fruit of good quality and of fine appearance. They sell at top prices and when once used will be asked for again, as the quality is far above most other reds. We now use nothing but Ruby when putting up red raspberries for our own use.

Ruby will please you and is an extra profitable market variety. Price, \$10.00 per thousand.

✓ **HERBERT.** This grand new red raspberry has been highly advertised for two or three years. Last year we had so much inquiry for Herbert plants that we bought two thousand plants and set them on our new ground.

We recommend Herbert to our customers. Described as follows: The canes are strong, vigorous and extremely hardy. The leaves are large, bright and are not affected with disease. Herbert is very productive and the fruit is very large, handsome and of extra fine quality. Price, \$2.50 per hundred; \$20.00 per thousand.

✓ **CUTHBERT.** Leading late market variety all over the country; strong grower, very productive, fruit firm, large size, of best quality; season medium to late.

Cuthbert is perfectly hardy, always yielding immense crops in the most northern states. There is not a fault to be found with Cuthbert. If you want an all around late red raspberry, plant Cuthbert. We have made far more money from our patches of Cuthbert than from any other red raspberry. (We are speaking of the fruit, of course, not plants.) We advise our customers and friends to plant Cuthbert for market or home use. Price, \$7.00 per thousand.

## Yellow Raspberries

✓ **GOLDEN QUEEN.** You can now have genuine, bright yellow raspberries on your table. Our patch of Golden Queen have done extra well on our new ground and we have a large stock of extra nice plants.

This is a bright yellow berry of very fine appearance and good quality. They certainly look nice on the table and are a novelty as well.

Yellow raspberry plants are scarce and are generally sold for more than twice as much money as we are asking. The berries are about the same size and shape as Cuthbert red, but are a beautiful yellow when ripe. Canes are strong and are perfectly hardy, going through our severe winters in good shape.

Golden Queen is very productive. Please note our special price.

60 cents per dozen; \$3.00 per hundred; \$25.00 per thousand.

## Everbearing Red Raspberry

✓ **ST. REGIS EVERBEARING.** This wonderful new red raspberry will give you a good crop of fine fruit from June until the berries freeze in the fall or early winter.

Think of it! Fresh raspberries all through the summer and fall, and nice ones, too. St. Regis have proven their worth the same as have fall bearing strawberries, and they are no experiment.

We have grown them on our own grounds and have picked the berries—fine ones—during July, August, September and October. You should have some for your own table use. Introduced three years ago as the most wonderful of all red raspberries. Fruit commences to ripen with the earliest and continuing on young canes until October. Berries bright crimson, large size, rich sugary with full raspberry flavor. Flesh firm and meaty, a good shipper. Wonderfully prolific. Canes stocky, of strong growth, with abundance of dark green leathery foliage.

Genuine St. Regis Everbearing plants, 50 cents per dozen; \$2.50 per hundred; \$20.00 per thousand.

**Ripe Raspberries All Summer.**

Cuthbert.  
Two-thirds natural  
size.

St. Regis Everbearing. Photographed Oct. 10th.

# Black Raspberries

(For price by the hundred, etc., see page 32.)

✓ **HOOSIER**—"The Dollar a Gallon Berry". This valuable black raspberry is certainly a money maker. We fruited about three acres of Hoosier on our new ground this summer and they were without exception the finest thing we ever saw in the black cap line. They produced a wonderful crop of extra large fine looking berries, and the field at fruiting time was a sight to see. We know Hoosier will please you and make you big profits. The plants are hardy, do not winter-kill, and will mature a full crop even to the tip of the canes. Canes are strong growing and are proof against anthracnose and other raspberry pests.

Hoosier ripens with Cumberland, mid-season. A very profitable black raspberry. Price, \$10.00 per thousand.

✓ **GREGG**. Fruit very fine and covered with bloom. Gregg has been the leading market variety all over the country, best for evaporating of any variety as it is said to give more pounds to the bushel than any other kind. A good all around late black cap. Gregg will not disappoint you. Very well and favorably known in every fruit district. Gregg is by far the best late black cap grown today. Try them and we will guarantee them to please you. Price, \$9.00 per thousand.

✓ **CONRATH**. This is a very profitable black cap. Plant is very productive, fruit large, good flavor, firm, nearly coal black, and parts readily from core. Although early it has a long season, and holds its size well to the end. Price, \$10.00 per thousand.

✓ **EUREKA**. This is a very valuable extra early black cap, as it produces a heavy crop of large berries and ripens them early while they are selling at a fancy price. A fine black cap in every particular. We have grown Eureka berries one inch in diameter. Unexcelled for fancy fruit. We guarantee Eureka to please you. Price, \$9.00 per thousand.

✓ **KANSAS**. This variety is now a general favorite with growers all over the country. Ripens just after Souhegan; jet black, firm, handsome and of the best quality; bush a strong grower, holds its foliage until frost; stands drouth and cold. We find it even better than we expected. It is about as large as Gregg, early and very productive. Strong, healthy canes, makes plenty of strong tips.

Kansas is very profitable as it is a good sure berry, producing a good crop every year. You can depend on Kansas for profit. Price, \$8.00 per thousand.

✓ **PLUM FARMER**. A wonderful new black raspberry that has already become one of the leading and most profitable varieties.

We guarantee Plum Farmer to bring you a paying crop of extra fine fruit. Our Plum Farmer field this year showed as heavy a crop of nice berries as we have ever seen, and we have had some fine fields of nearly all varieties. The plants are very healthy, have a silvery bluish appearance when ripened in the fall and succeed where others fail. The fruit is grayish black, very firm, a good shipper, attractive, of the very highest flavor and is adapted for evaporating, as well as for fresh market or home use.

Plum Farmer is a large berry and strictly first class in every way. You have no doubt heard or read of the wonderful crops of this variety in many places.

Plum Farmer.  
A Wonderful Yields and very Profitable.

Cumberland.

Plum Farmer is a great variety and you should have some. We bought our stock of the introducer and we know they are true to name.

Our Plum Farmer plants were grown on our new ground, and, of course, are extra large, with heavy roots. Price, \$12.00 per thousand.

✓ **CUMBERLAND.** The "Business Black Cap." Biggest black raspberry known. This black raspberry is offered with the full assurance that it is the most profitable and desirable market variety yet known, because of its immense size, firmness and great productiveness.

Cumberland is very hardy, having withstood a temperature

of 16 degrees below zero without injury. 'Extra productive, being the heaviest bearing variety now grown. Fruit is jet black and of extra fine quality. Ripens

before Gregg. Buy Cumberland for profit. Price, \$9.00 per thousand.

**Has Used Baldwin's Plants for 25 Years.**  
Please read this one.

Port Byron, Ill., Feb., 6, 1913.

Mr. Baldwin:—Looking over my files, I find that this annual correspondence has been taking place very regularly for the last 25 years, between your father and you and myself. I am now getting near to the jumping off place, and this is to tell you that my son, George II will take my place. He is now preparing an order for you. Treat him as well as you have me and there will be no kick. Yours,

GEO. HUNT, Sr.

**Our Plants Best Regardless of Price.**

Baldwin, Mich., Apr. 21, 1913.

O. A. D. Baldwin, Bridgman, Mich.

Dear Sir:—I received my plants in fine condition and found every plant O. K. In fact, they are the best plants I ever bought regardless of price. I showed them to some of my neighbors and they said the same thing. I have set the plants and they all look good. Wishing you success. I remain,

Yours respectfully,

E. C. BARTENBACH.

Picking Cumberland Black Raspberries on the farm of Mr. T. C. Woodward of Carlisle, Ind.

These plants were set in April, 1911, and this photograph was made in July, 1912, showing our new ground plants producing a big crop of berries, the first year after planting. Note the perfect stand of plants and heavy growth made the first season.

# Purple Raspberries

For price by the hundred, etc., see page 32.)

Set same distance apart as black raspberries.

✓ **COLUMBIAN—(Purple Cap).** The Columbian is a variety of the Shaffer type, of remarkable vigor and productiveness. It is very hardy and propagates from tips. Fruit very large, often an inch in diameter, shape somewhat conical; color dark red, bordering on purple; adheres firmly to the stem; seeds small and deeply imbedded in a rich, juicy pulp with a distinct flavor of its own, making it a delicious table berry.

Columbian Purple raspberries are the finest berries grown for canning, and for pies. If you have no purple raspberries on your place, do not fail to order a few hundred Columbian or Haymaker for your own table use.

Every year the demand for purple raspberries has exceeded the supply and the late orders have to be turned back unfilled. We advise ordering early. No fruit farm or garden is complete without purple raspberries.

Price of Columbian, \$15.00 per thousand.

✓ **THE HAYMAKER—(Purple Cap).** Much like Columbian, but probably a stronger grower, being lower growing and more stocky. Haymaker stands shipping extra well and is an extra fine berry to grow for either home use or market. Very productive.

We use Haymaker for our own table use and canning. They are especially fine for home use, and you will like them very much.

Haymaker certainly has four points of superiority, viz.: Vigorous growth, hardiness, productiveness and quality. Haymaker is a good thing to have and the demand for this variety is very heavy every year.

Price, \$15.00 per thousand.

A Dish of Columbians.

## Blackberries

(For price by the hundred, etc., see page 32.)

✓ **ELDORADO.** We place this variety ahead of all others without a moment's hesitation. It is the greatest blackberry in general cultivation today. Eldorado is as hardy as the Snyder, twice as large and of better quality. When you get one like that you have a berry that cannot well be beaten. Eldorado has never been known to winter-kill, even in northern Michigan and Wisconsin. For home and market use, we recommend Eldorado above all others. We consider it the best blackberry ever fruited in every way, and we have grown them all. Our Eldorado field is a sight to see in blossoming and fruiting time. The fruit is good size, firm and of the very highest quality. Very profitable, as it needs no protection in winter. Our plants this year are the finest we ever raised, and our stock is the largest, but we expect to be sold out of this variety before shipping season is over.

We advise you to place your order for Eldorado as soon as possible.

Our new ground plants only \$12.50 per thousand.

Eldorado.  
Two-thirds natural  
size.

holds its color well after picking, needs protection at the North. It is the best shipper there is. Very profitable. It always sells at a premium over other varieties. The berry is large, and jet black. Order some Wilson plants. They are money makers. Price, \$8.00 per thousand.

✓ **WILSON'S EARLY.** One of the largest and most productive of the early sorts; produces fruit in large clusters, sweet as soon as black, holds its color well after picking, needs protection at the North. It is the best shipper there is. Very profitable. It always sells at a premium over other varieties. The berry is large, and jet black. Order some Wilson plants. They are money makers. Price, \$8.00 per thousand.

✓ **MERSEREAU.** A good hardy variety. Mersereau is an early, mammoth, iron-clad blackberry. It originated in northwestern New York, where the mercury falls from 15 to 25 degrees below zero, and where it has stood in open field culture for many years without the slightest protection, never being injured in the least. In quality it is exceptionally sweet, rich, melting and luscious, being without core, the seedy character of Snyder and most other sorts is noticeably absent. As a shipper and keeper it is unsurpassed, remaining firm, without "bleeding" in handling. The canes are of exceedingly strong, upright habit, attaining upon fairly good soil a height of eight feet, if permitted to grow unchecked, and are so stout as to always remain erect; foliage large, deep green, and abundant. Mersereau yield a good crop of large, fine looking berries. Season early to mid-season. Price, \$15.00 per thousand.

We have never exploited plants of any kind or variety under an assumed name to gain public favor. We fill orders **TRUE TO NAME.**

Blower.

✓ **BLOWER.** Originated in the celebrated small fruit belt of Chautauqua County, New York, where it has been thoroughly tested for several seasons.

We have a fine field of Blower on our new ground and have grown an extra fine lot of large, heavy-rooted plants. Blower is a hardy variety, very productive and a good shipper.

We were somewhat disappointed with the fruit of this variety the past summer, but of course blackberries ripened during the very dry weather and we had been letting our patch go for plants and had not cultivated as we should have done for a fruit crop.

Blower is highly recommended and we would suggest that you try a few of them. Price, \$15.00 per thousand.

## Dewberries

✓ **LUCRETIA.** The best of the blackberry family. Berries are far larger and incomparably better than any blackberry; of unequalled excellence; soft, sweet and luscious throughout, of brightest glossy black color. The Lucretia Dewberry has received the endorsement and highest praise from the best horticulturists in the country. Its trailing habit renders it less liable to winter-kill. Propagates

from the tips. Plant in rows six feet apart with plants three feet apart in the row, requiring 2,425 plants per acre.

Price, \$8.00 per thousand.

## Giant Himalaya Berry

Described as follows: "The Himalaya vine looks like a blackberry vine and the fruit tastes like a blackberry, still the plant has the nature of a tree or a grape in that the wood does not die down every year as with raspberries and blackberries, but continues to bear fruit right along year after year. Himalaya berry commences to ripen in August and continues until October."

The long fruiting season and the fact that the canes continue to bear for several years should make it a valuable variety if it is good in other ways. The berries are small and sour, and while it is claimed they improve very much after hanging on the vine a few days, we do not recommend them for this part of the country. We do not advise our customers to buy many nor have we ever recommended Himalaya berry. Price, 50c per dozen; \$2.50 per hundred.

## Buy New Ground Seed Potatoes This Year

We grow potatoes on our new ground to subdue it for plants, and our seed is vigorous and healthy. See page 31 of this catalog for descriptions and low prices on leading early and late varieties. We can save you some money on your seed potatoes for spring planting. Michigan grown potatoes are hardy, healthy, and we **GUARANTEE SATISFACTION** with our seed.

# Currants

(For price by dozen, thousand etc., see page 32.)

You should all grow at least enough Currants for your own use.

London Market is far ahead of all other red currants for home use and market.

The new canes do not bear till the second and third years, so do not trim out the old canes till the third year at least. If the currant worm appears, dust with hellebore.

Our currant plants are first class in every way. They have good strong canes and are heavy rooted and will please you.

✓ **LONDON MARKET (Red).** This is the best red currant we have ever fruited. A fine new variety, a strong grower, large fruit and very productive, holds its foliage late and is not liable to attack of worms and borers.

Plant is extremely vigorous, with perfect foliage, which it retains through the season. London Market will please you. Try them in your garden.

Price, \$4.50 per hundred.

✓ **RED CROSS (Red).** This is a good currant, but we believe both London Market and Cherry are better. This variety seems to be grown more in the eastern states, and we can furnish Red Cross if wanted by our customers. Not extensively propagated and price is high. \$5.00 per hundred.

✓ **VICTORIA (Red).** Berries are very large; bunches long; fruit of bright red color and excellent quality. It is a very strong growing variety and exceptionally hardy. One of the very best of the old varieties, but is not so productive as London Market. Price for Victoria, \$4.50 per hundred.

✓ **CHERRY (Red).** A very popular red currant, grown all over the country for home use and market. The berry and bunch are very large and there is always a good crop of fruit every year. Cherry is a handsome fruit and it is a pleasure to grow them. The fruit of Cherry currant will please you and bring good profits. Price, \$4.50 per hundred.

✓ **PERFECTION (Red).** This truly wonderful new currant has both large size and extra good quality. Perfectly healthy, a vigorous grower, and in fact an extra fine red currant in every way. Widely advertised all over the country. Price of Perfection, \$10.00 per hundred.

✓ **LEE'S PROLIFIC (Black).** This is the leading variety of the black currant. Very heavy bearer of large bunches of fruit. Extra quality. Valuable for home use. \$5.00 per hundred.

✓ **WHITE GRAPE (White).** Very large, yellowish white, sweet or very mild acid; excellent quality and valuable for the table. The finest of the white sorts. \$5.00 per hundred.

## Gooseberries

(For price by dozen, etc., see page 32.)

Set gooseberry plants four feet apart in row, with rows five feet apart.

Cultivation should be given until the plants are well established, usually about the third year; after this they may be permanently mulched, if desired. As the best fruit is borne on the two and three

Downing.  
(A money maker.)

year old wood a certain amount of pruning will be necessary to encourage a strong growth of canes and in the removal of the older wood after bearing. There is big money in growing gooseberries.

✓ **DOWNING.** (See illustration on page 29). Downing is a yellowish green sort, and of good size, being a strong growing bush and a very prolific bearer. This is the most popular variety of gooseberry. Downing is extra large and of strictly first class quality. They will make you good profits. Price, \$8.00 per hundred.

✓ **HOUGHTON.** An enormously productive and always reliable old sort; of vigorous, yet rather slender spreading growth, not subject to mildew. Fruit of medium size, smooth, pale red; tender and good. Houghton is a very profitable gooseberry, as the fruit hangs so thick on the branches that it can easily be stripped off by wearing leather gloves. In this way they can be picked very rapidly and at small expense. The best and cheapest way to remove the leaves, etc., is to put them through an ordinary fanning mill. This is a great advantage Houghton has over the Downing and other large varieties. Houghton is very profitable. Try them this year. Price, \$7.00 per hundred.

## Grape Vines

(For price by dozen and thousand, see page 32.)

Plant grape vines for field culture eight by twelve feet, requiring about 435 plants per acre.

Grape vines will grow and do well on light sand or clay where it is hard to raise a crop of grain or other fruit.

Concord.

✓ **CONCORD** (Black). This is the grape so largely planted all over the country for commercial purposes. Concord is the main variety of grape for profit and is sold in large quantities. A large, purplish black grape, ripening about the middle of September; vines remarkably vigorous and free from disease; the standard for productiveness and hardiness all over the country.

Price only \$2.50 per hundred.

✓ **WORDEN** (Black). In brief, an improved Concord, being larger in both bunch and berry, handsomer, nearly two weeks earlier and of better quality. Very choice and reliable. Worden will not yield like Concord and so are not planted so extensively for market. They are an extra good grape for home use. By far the best flavored black grape we have.

Price, \$3.50 per hundred.

✓ **MOORE'S EARLY** (Black). Bunch large, berry round, color black, with a heavy blue bloom; quality better than the Concord. Moore's Early is hardy and free from disease. You can get your Moore's Early off a few days ahead of the main market varieties and get from three to five cents per basket more for your crop. Price, \$4.00 per hundred.

✓ **CAMPBELL'S EARLY** (Black). A wonderful new grape of excellent quality and great productiveness. As a good keeper and shipper it is believed to be unequalled by any other grape. Vines very hardy. Campbell's Early is an early grape but can be left on the vines two weeks if necessary and the quality of the fruit increases all the time. It is both as to cluster and berry, of large size, of glossy black color, with a beautiful blue bloom, pulp sweet and juicy, free from foxiness, seeds small, few in number and parts readily from the pulp. Price, \$9.00 per hundred.

✓ **DELAWARE** (Red). Bunch small, compact, sometimes shouldered, berries small; skin thin, but firm; flesh juicy, very sweet and refreshing, of best quality for both table and wine; ripens with Concord or a little before; vine hardy. Delaware is extra fine for eating fresh or for home use. A pale red grape. Price, \$5.00 per hundred.

✓ **NIAGARA** (White). This is the leading white grape throughout the country. Fruit is large and of fine quality. We recommend Niagara very highly for home use. Bunch and berries large, greenish white, changing to pale yellow when fully ripe; skin thin but tough. Price, \$4.00 per hundred.

---

**SPECIAL GRAPE OFFER**—We will send by mail, postpaid, 6 grape vines, ONE VINE OF EACH VARIETY MENTIONED ABOVE, for only \$1.00.

# Seed Potatoes

(For price by the peck and barrel, see page 32.)

You all know that it does not pay to plant small potatoes or plant from the same seed year after year. Your potatoes will soon "run out", as they say.

These potatoes are strictly No. 1 seed, guaranteed pure and unmixed. We will begin to ship early in March or as soon as weather permits us to ship with safety.

Peck, 15 lbs.; Bushel, 60 lbs.; Barrel, 165 lbs.

Potatoes will be shipped in bags, carefully sorted and labeled, F. O. B. cars.

**SIR WALTER RALEIGH.** The greatest late potato we have ever seen. Our Sir Walter Raleigh are extra fine this year, all being grown on new ground. We had not given this grand new late potato a fair chance before, but we now know its value as a heavy yielding and drouth resisting variety. Noted for its **yield, size, smoothness and handsome appearance.** It is a regular Rural New Yorker in type. Skin pure white, thin and transparent, eyes few and very shallow, almost blight proof, a sure yielder where others fail. Sir Walter Raleigh is a good one and we guarantee it to bring you a good crop of extra fine potatoes in almost any kind of a season. Price, \$1.25 per bushel.

**CARMAN NO. 3.** We recommend this fine late variety to all for a sure cropper and profitable either for market or home use. Carman No. 3 makes great yields of fine, large, smooth tubers even under the most unfavorable circumstances and can be relied on to **bring in money.** It grows a very strong, upright top and is little affected by blight, drought or bugs. It is of the Rural family; keeps as well and is fine for eating as soon as dug. Very heavy yielder. Price, \$1.25 per bushel.

**RURAL NEW YORKER.** Planted largely for main crop on account of its keeping qualities. Tubers nearly round, flattened, with very smooth, pure white skin, uniform in size, very attractive. A general favorite throughout the country on account of productiveness, uniform size, color and keeping qualities. Price, \$1.25 per bushel.

**MARK HANNA.** A wonderful new late potato of the Rural type. They seem to be all of one size—all about four inches long, round and slightly flattened. This is a valuable variety and we recommend it to our customers as a good new late potato. Closely resembles Carman No. 3 and Sir Walter Raleigh in general appearance. Price, \$1.25 per bushel.

**EARLY MICHIGAN.** This we consider the best early potato on the market. We find Early Michigan to be a heavy yielding, smooth, white potato that produces a big crop. The tubers are about the shape of Beauty of Hebron, but are clear white and have a smoother surface and are very uniform in size. Early Michigan will yield a good crop of good sized, white potatoes. Price, while they last, \$1.50 per bushel.

**EARLY MAINE.** This wonderful new early potato will outyield all other early varieties and some of the late ones. Early Maine is a wonder and did better for us this year (in a dry season) than any other variety. They are not white, but we guarantee them to bring you a great big crop of large, evenly shaped potatoes very early. If you grow for your own use the color makes no difference anyway. A fine looking, smooth potato. They are about the color of Beauty of Hebron and are an extra heavy yielding early potato. Try Early Maine this year. Price, \$1.50 per bushel.

**EARLY ROSE.** A tried and true variety that you all know. Early Rose are shaped like Beauty of Hebron; are extra early in maturing and are a beautiful pink in color. They are a good sure potato to grow for early market. Price, \$1.50 per bushel.

Early Michigan.

## **Photograph of Fall Bearing Strawberries**

---

The berries from which the above photograph was made were picked from field grown fall-bearing strawberry plants and photographed September 11th.

---

We have grown a large stock of **Superb** and other fall-bearing Strawberry plants on our new ground this year and we guarantee them to be true-to-name.

We are picking a nice crop of fancy berries this fall from our plants set last April. You should have fresh strawberries during August, September and October. Order them early.

See inside of catalog for descriptions, prices, etc.
